DETAILED ACTION

Response to Amendment

1. Applicant's amendment and remarks received on 25 July 2005 have been entered.

Drawings

2. The replacement drawings were received on 25 July 2005. These drawings are acceptable.

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. The following is an examiner's statement of reasons for allowance: Applicant has amended independent claims 1 and 18 to define the predetermined discharge region and the predetermined non-discharge regions being within an area sealed by frit and barrier ribs mounted on the non-discharge regions. Applicant argues that the applied references do not teach these limitations, since the references teach the non-discharge region being in an area outside of the area sealed by frit. Applicant's arguments are persuasive.
5. Thus, regarding independent claim 1, the prior art of record neither shows or suggests a plasma display panel comprising, in addition to other limitations of the claim, a predetermined discharge region and predetermined non-discharge regions being within an area sealed by frit, wherein barrier ribs are mounted at least partly on the discharge region and at least two of the barrier ribs are mounted at least partly on the

Art Unit: 2879

non-discharge regions. Due to their dependency upon independent claim 1, claims 2-17 are also allowable.

6. Regarding independent claim 18, the prior art of record neither shows or suggests a plasma display panel comprising, in addition to other limitations of the claim, a discharge region and non-discharge regions being within an area sealed by frit, a plurality of the barrier ribs mounted between substrates on the non-discharge regions that are adjacent to the long side edges of the substrates. Due to their dependency upon independent claim 18, claims 19-20 are also allowable.

7. The subject barrier rib structure discussed above is provided for preventing the generation of noise caused by gaps formed between the barriers ribs and the substrates. The design is new and unique to the art.

8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
